Thanks, Dan.

I removed a couple of the acronyms we didn't need. Yariisa are you able to translate the below:

On June 14, 2016 a fire destroyed an industrial property located at 3570 Fruitland Avenue in Maywood, CA. The fire impacted two separate facilities on the Fruitland Avenue property - Panda International Trading, a scrap metal recycling business and SOKOR Metals, a precious metals recovery business. Cleanup of hazardous substances at 3570 Fruitland Avenue will begin the week of October 17th, 2016 and take approximately 8 weeks to complete. A United States Environmental Protection Agency (EPA) Federal On-Scene Coordinator (FOSC) will be the lead EPA official for the cleanup of hazardous substances. The EPA FOSC will coordinate the agency's activities with state and local agencies, including the Los Angeles County Department of Public Health, the Los Angeles County Fire Health Hazardous Materials Division and the California Department of Resources, Recycling and Recovery.

Thanks Najal. I like the layout and the graphics.

I would prefer that the opening site summary on the website be the following text: It will have to be translated into Spanish. Thanks, Dan

-

English

On June 14, 2016 a fire destroyed an industrial property located at 3570 Fruitland Avenue in Maywood, CA. The fire impacted two separate facilities on the Fruitland Avenue property - Panda International Trading ("PIT"), a scrap metal recycling business and SOKOR Metals, a precious metals recovery business. Cleanup of hazardous substances at 3570 Fruitland Avenue will begin the week of October 17th, 2016 and take approximately 8 weeks to complete. A United States Environmental Protection Agency ("EPA") Federal On-Scene Coordinator ("FOSC") will

be the lead EPA official for the cleanup of hazardous substances. The EPA FOSC will coordinate EPA's activities with state and local agencies, including the Los Angeles County Department of Public Health, the Los Angeles County Fire Health Hazardous Materials Division and the California Department of Resources, Recycling and Recovery ("CalRecycle").

On June 14, 2016, a fire started in Maywood, Calif. The fire burned Panda International Trading, located at 3570 Fruitland Avenue. Fruitland Avenue is a commercial/light manufacturing district. A residential neighborhood directly borders the south end of the site. The facility includes businesses, Panda International Trading (PIT) and Sokor Metals. PIT is a scrap metal yard that sends scrap metal for reuse, and Sokor Metals is also a metals recycling operation. EPA, along with its state and local partners, continues the response operations and assessment of hazardous waste and will begin removing materials that remain in the aftermath of the Incident in Maywood.

Subject: For Immediate Review: Fruitland website

Hi Dan/Jason/David,

As you know, I've been working with Bonnie and the web team to create a website for the Fruitland response. The draft site is up and ready for your review and approval. All past and present documents have been uploaded to the site (Eng and Sp). Please take a look and let me know if there is anything missing, or if you have any edits. We are aiming to get the website live by the end of the day today or tomorrow morning since we included it on our factsheet. If you can take a look at this ASAP and let me know if you approve or have edits that would be great.

David: With Soledad out, I need some translation help. I translated the info using our factsheet and Google translate. Can you have someone review ASAP.

You can find the draft website at the below link. You will need to enter your LAN username and password for access. <https://wcms.epa.gov/node/161769/revisions/431149/view>

El 14 de junio de 2016, se inició un incendio en Maywood, California. El fuego quemó Panda International Trading, situada en 3570 Fruitland Avenue. Fruitland Avenue es un distrito comercial de manufactura ligera. Una zona residencial directamente al sur limita el sitio. La instalación incluye empresas, Panda International Trading (PIT) y Sokor Metals. PIT es un área de acumulación de chatarra de metal que envía chatarra para su reutilización, y Sokor Metals también opera reciclaje de metales. EPA, junto con sus socios estatales y locales, continúa las operaciones de respuesta y evaluación de residuos peligrosos y se iniciará la eliminación de materiales que permanecen en la raíz del accidente en Maywood.
